Brand New Book ***** Print on Demand *****.Excerpt from Experimental Farms: Reports, 1897 While it must be admitted that conditions of climate and the general character of the season - which are beyond the control of the farmer are most important factors bearing on crop production, still there are many things which the farmer may do which will greatly increase the chances for abundant returns, provided the season is favourable. It is gratifying to know that during recent years more thought and attention has been given by farmers to their calling, that improvements have been manifest in the preparation of the soil, and the general management of the crops; the stores of fertility in the land have been more carefully husbanded, by a judicious rotation of crops; more attention has also been paid to the care of barn-yard manure, and greater efforts made to replace those elements in the soil, which repeated cropping has removed. The progress which has been made is encouraging; it has given Canadian farmers a reputation which it is most desirable should be maintained, and has, at the same time,...
