

## Publications of the Astronomical Laboratory at Groningen Volume 20-25

Filesize: 2.33 MB

### ***Reviews***

*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.*

## PUBLICATIONS OF THE ASTRONOMICAL LABORATORY AT GRONINGEN VOLUME 20-25

To save **Publications of the Astronomical Laboratory at Groningen Volume 20-25** eBook, remember to refer to the web link below and save the file or gain access to additional information which are have conjunction with PUBLICATIONS OF THE ASTRONOMICAL LABORATORY AT GRONINGEN VOLUME 20-25 ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: .by a suitable ground opal glass ab. L is a small incandescent lamp, which can be moved in the tube, cd an opal glass plate and mn an iris-diaphragm. Fig. 1. The illumination of the plate ab is altered by means of the iris-diaphragm until the brightness of ab appears to be equal to that of some portion of the sky. The brightness is measured by the diameter of the opening in the diaphragm. With this instrument some determinations have been made in our country and also in South-Africa at a greater altitude above the sea-level. The results were nearly equal to those obtained by other investigators. In South-Africa, however, the relative brightness of the Galaxy was found to be a little greater than in our country. On the whole the instrument did not answer the purpose. First the bounding line between the two comparison-fields could not be made sufficiently sharp and therefore it did not vanish at equal illumination. Secondly the comparisons were hindered by the slightest difference of colour between the illuminated glass plate and the sky. I have purposely entered so much into the details of earlier investigations, 18 because in photometric work it is difficult to find out reliable methods, and 20 to justify the supposition that the question must be much more complicated, as the results differ widely from those obtained by star-gauges. In the next chapter, I will pass on to the description of the methods and instruments used in...
