Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: . . . of the individual throughout the stages of its growth, the transmission of life by generation are characteristics of the living organism which science is utterly unable to imitate. 17 The chemists may analyze and combine, but cannot produce the living being. The germ of life is wanting. 21. Mr. Tyndall admits that the chemist can produce organic substances, but says that life can come only from demonstrable antecedent life. 18 What makes, asks Mr. Preyer, the materials of a seed or of an egg so combine that life results from their activity In vain does chemistry grope for an answer. 19 Mr. Haeckel bids us look to carbon for the cause, but does not tell how it is. 20 22. Again the methods of chemistry and the meth methods of 0 J chemistry ods of life are totally different. Chemistry employs and of life, electric currents...
